Part 2640: Prescribing, Administering and Dispensing

Part 2640 Chapter 1: Rules Pertaining to Prescribing, Administering and Dispensing of Medication

Rule 1.11 Prescription Guidelines - All Medications. In addition to any other requirements set forth in these rules pertaining to the issuance of prescriptions of controlled substances, the following additional requirements apply to all prescriptions, whether or not said prescriptions are for controlled substances, legend drugs or any other medication:

A. Prescriptions may not be written outside of a valid licensee-patient relationship. While not all of the elements in subsection A are necessary each time a prescription is authorized (e.g., via appropriate telemedicine as defined in Rule 5.5 of Part 2635, calling in refills, taking call for a practice partner for short term care, etc.), all initial encounters, and at reasonable intervals thereafter, should conform to this rule and be done pursuant to a valid licensee-patient relationship. The elements of this valid relationship are:
   1. verify that the person requesting the medical treatment is in fact who they claim to be;
   2. conducting an appropriate history and physical examination of the patient that meets the applicable standard of care;
   3. establishing a diagnosis through the use of accepted medical practices, i.e., a patient history, mental status exam, physical exam and appropriate diagnostic and laboratory testing;
   4. discussing with the patient the diagnosis, risks and benefits of various treatment options to obtain informed consent;
   5. insuring the availability of appropriate follow-up care; and
   6. maintaining a complete medical record available to patient and other treating health care providers.

B. Electronic prescription transmission is permitted provided the transmission meets applicable state and federal standards for transmission. E-prescribing is the electronic entry of a prescription by a licensee, the secure electronic transmission of the prescription to a pharmacy, the receipt of an electronic message by the pharmacy and E-prescription renewal requests sent electronically by the pharmacy to the practitioner.

C. Every written prescription delivered to a patient, or delivered to any other person on behalf of a patient, must be manually signed on the date of issuance by the licensee. This does not prohibit the transmission of electronic prescriptions and telefaxed prescriptions (but not e-mail) for non-controlled drugs to the pharmacy of the patient's choice. Such telefaxed or electronic prescriptions must be authorized by a written or electronic signature and must be issued in accordance with all other provisions of this rule. No prescriptions for any form or compound containing nalbuphine HCl, carisoprodol, butalbital compounds, or tramadol HCl shall be telefaxed.

D. Electronic prescriptions for controlled substances are permitted if a practitioner has complied with the DEA requirements and is using a certified electronic prescribing system for the transmission of control substances prescriptions.

E. All written prescriptions must be on forms containing two lines for the licensee's signature. There must be a signature line in the lower right-hand corner of the prescription form beneath which must be clearly imprinted the words "substitution permissible." There must be a signature line in the lower left corner of the prescription form beneath which must be clearly imprinted with the words "dispense as written." The

licensee's signature on either signature line must validate the prescription and designate approval or disapproval of product selection. Each prescription form must bear the pre-printed name of the licensee or the licensee must clearly print his or her name on the prescription form, in addition to the licensee's original signature. In the event that the prescription form bears the pre-printed name of more than one licensee, the licensee must clearly indicate the name of the licensee writing the prescription. In the case of a prescription that is electronically generated and transmitted, the licensee must make an overt act when transmitting the prescription to indicate either "dispense as written" or "substitution permissible". When done in conjunction with the electronic transmission of the prescription, the prescriber's overt act indicates to the pharmacist that the brand name drug prescribed is medically necessary.

F. If a prescription form which does not contain two signature lines required in Part 2640, Chapter 1, Rule 1.11.D is utilized by the licensee, he or she must write in his or her own handwriting the words "dispense as written" thereupon to prevent product selection.

Every written prescription issued by a licensee for a legend drug should clearly state whether or not the prescription should be refilled, and if so, the number of authorized refills and/or the duration of therapy. Licensee s should avoid issuing prescriptions refillable on "prn" basis. If a licensee chooses to issue a prescription refillable "prn", the life of the prescription or time limitation must clearly be set forth on the prescription. In no case shall a prescription which is refillable on a "prn" basis be refilled after the expiration of one (1) year. Regardless of whether a prescription is refillable on a "prn" basis or the prescription expressly states the number of authorized refills, the use of said medication should be re-evaluated on at least an annual basis. Upon the expiration of one (1) year, a prescription becomes invalid, regardless of the number of refills indicated or "prn" designation.

G. Every written prescription issued by a licensee, bearing more than one non-controlled medication, must clearly indicate the intended refill instructions for each medication. Lack of clearly indicated refill instructions prohibit the refilling of the medications. All unused lines on a multi-line prescription blank must be clearly voided by the issuing licensee.

H. A prescription will no longer be valid after the occurrence of any one of the following events:
   1. Thirty (30) days after the death of the issuing licensee.
   2. Thirty (30) days after the issuing licensee has moved or otherwise changed practice location resulting in termination of the licensee patient relationship. Termination of the licensee patient relationship results when a patient is no longer able to seek personal consultation or treatment from the issuing licensee.
   3. Immediately after loss of DEA Controlled Substances Privilege by the issuing licensee if the prescription is for controlled substances.
   4. Immediately upon revocation, suspension or surrender of the licensee's license.

Amended July 19, 2018
